# INTRODUCTION

Strengthening pharmaceutical production in Africa is considered a necessary strategy to ensure fair access to medicines and achieve the continent's self-sufficiency in order to be better prepared to face health emergencies that may affect global supply chains. Likewise, developing pharmaceutical production contributes to protection from shortages and therefore to achieving health and commercial security, and to contributing to establishing high-level regional cooperation.

Within this framework, Algeria organizes, in coordination with the World Health Organization, a conference of African Ministers of Health and Industry in Algiers in November 2025, coinciding with the 71st anniversary of the outbreak of the glorious Algerian Revolution, under the high patronage of His Excellency Mr. Abdelmadjid Tebboune, President of the People's Democratic Republic of Algeria, at the initiative of the Ministry of Pharmaceutical Industry.

This conference, the first of its kind at the regional level, will focus on strengthening local pharmaceutical production and health technologies to improve access to them. It will conclude with the issuance of the "Algeria Declaration" to obtain recommendations and tangible results to support local and regional production in Africa.

The conference aims to discuss practical mechanisms to develop strategies and joint recommendations aimed at strengthening production capacities in Africa in the field of local pharmaceutical production, with a focus on ensuring access to safe and effective health products at reasonable prices and available to all African countries.

# OBJECTIVES

**01** Highlight the health and economic benefits of sustainable local production

**02** Identify the challenges and obstacles facing African countries

**03** Encourage multisectoral cooperation

**04** Analyze regional and national needs

**05** Strengthen regional integration

**06** Reinforce regulatory frameworks

**07** Propose incentives and policies to promote industrial investment

**08** Integrate innovation and artificial intelligence

**09** Formulate practical and applicable recommendations

**10** Establish a mechanism for monitoring and evaluation

## **ADVANTAGES**

**For the continent :**

**This conference will allow the discussion of operational mechanisms to develop strategies and joint recommendations aimed at strengthening production capacities in the pharmaceutical field across Africa.**

**The focus will be on improving the accessibility of safe, effective, and high-quality pharmaceutical products, which will contribute to reducing dependence on imports of medicines.**

## **ORGANIZATION**

**The ministerial conference will be held in November 2025 at the Abdel Latif Rahal International Conference Center under the high patronage of His Excellency Mr. Abdelmadjid Tebboune, President of the People's Democratic Republic of Algeria.**

**The conference will see the participation of more than 15 African countries, including Egypt, South Africa, Nigeria, Ethiopia, Senegal, Rwanda, Ghana, Tanzania, Zimbabwe, Kenya, Cameroon, Côte d'Ivoire, Angola, Uganda, and others.**

**The event will also witness the participation of Ministers of Health, Industry, and Trade from African countries, as well as international organizations such as the World Health Organization (WHO), the African Union, the African Development Bank, the African freximbank and other experts and partners from Algeria and all Africa.**
